

CORE PROGRAM MODEL

CHI Recovery Program Model:

- The CHI evidence based program model contains six phases over an estimated six month period
- Participant centered approach utilizing combined expertise of multi-disciplined practitioners
- Practitioner team includes medical doctor, integrative health practitioner, individual psychotherapist, group psychotherapist, case manager and program manager
- Participant encircled by his or her Case Manager throughout program
- Entire team encircled by the Program Manager throughout program
- Material following attempts to provide the who, what, when and how of each phase of the program
- We begin with the timeline, the inquiry and comprehensive assessment process

Key:
